Power Supply	ATX (not included)

Advanced Features for Extreme Flexibility

Six drive bays with clever snap-in trays accommodate both 3.5" and 2.5" drives with no adapter necessary. A unique cable routing system virtually eliminates cable clutter that can impede airflow. The tool-free design allows for easy entry, easy access, and quick installation of 5.25" drives.

Features include

- Dual 200mm fans provide outstanding cooling for even the hottest components
- Easily accessible dust filters make maintenance simple and hassle-free
- Quick-release side panels make it easier than ever to upgrade your hardware
- Integrated fan controller lets you quickly adjust cooling performance and noise levels
- Four tool-free optical drive bays and up to six SSD-ready hard drive trays provide plenty of expansion
- CPU backplate cutout makes it easy to upgrade your CPU cooler
- Brilliant cable routing system provides a way to keep your system neat and tidy
- Adjustable drive cages can be removed and relocated to accommodate large video cards
- Room for long power supplies gives you peace of mind for future upgrades

About The Obsidian Family

The Obsidian Series 800D and 700D full-tower cases share the same case dimensions, rock-solid construction, isolated cooling zones, and lots of other features that make them truly great cases for builders. Choose the Obsidian Series 800D if you'd like hot-swap SATA drive bays and the clear side panel strikes your fancy; if you don't need the hot-swap feature and you like the look of the solid side panel, the Obsidian Series 700D is for you. The 650D is a mid-tower variant for those that don't need the room of the 800D and 700D, but still want excellent cooling and elegant good looks in a compact package.
